CAREER OBJECTIVE

Entry-level Software Engineer with two years of hands-on experience in AI evaluation and full-stack development. Skilled in Python, JavaScript, C++, and React, with a solid understanding of algorithms, data structures, and database fundamentals. Passionate about collaborating on scalable, high-quality solutions and eager to learn and grow within a dynamic engineering team.

EDUCATION

University of North Texas
Bachelor of Science in Computer Science

Denton, TX
December 2020

WORK HISTORY

Software Development and AI Testing Specialist
DataAnnotation

January 2024 – Present
Remote

- Craft and refine over 100 prompts tailored to assess the capabilities and limitations of Artificial Intelligence systems in software development scenarios
- Utilize comprehensive evaluation frameworks to analyze and benchmark chat bot responses against predefined criteria and industry best practices
- Conduct thorough assessments of hundreds of AI-generated responses to ensure compliance with safety standards, correctness of information, and overall quality

EXPERIENCE

MLB Stats Interface | *React.js, Python, Flask*

Personal Project - 2025

- Implemented a responsive web app that utilizes API calls to the Official Major League Baseball Statistics API.
- Designed an interactive front end that allow the user to view both pitching and hitting stats
- Developed a feature that allows the user to compare two players stats.

Wordle Clone | *React.js*

Personal Project - 2024

- Implemented a responsive web app that mimics the game mechanics of the *New York Times* game 'Wordle'.
- Designed a front end that shares a similar look to the original.
- Incorporated a feature to allow the user to play the game forever, endlessly generating a new word from a word bank of over 2000 words for the user to guess.
- Demo: <https://wordle-clone-psi-two.vercel.app/>

Personal Portfolio Web-App | *React*

Personal Project - 2024

- Developed a personalized React front-end web application, utilizing components, to showcase my portfolio of projects and resume.
- Demo: <https://react-app-vert-psi.vercel.app/Home>

Car Dealership Catalog | *MongoDB, Express.js, React.js, Node.js aka MERN*

Personal Project - 2023

- Created a user-oriented car catalog Front End using React technology.
- Enabled the Front End to seamlessly retrieve vehicle information from the MongoDB database.
- Incorporated a functionality within the web app that empowers employees to seamlessly add new cars to the catalog.
- Demo: <https://cardealer-frontend.onrender.com>

Lyft | *Back-End Engineering Job Simulation, Python*

October 2023

- Completed the Back-End Engineering job simulation, taking over development of an unfinished project for the Lyft Rentals team.
- Drafted a UML class diagram representing a new reorganized architecture.
- Refactored a messy codebase inherited from another team to accurately reflect my new design.
- Implemented unit tests and added new functionality using test-driven development.

TECHNICAL SKILLS

Languages: C, C++, C#, Python, JavaScript, HTML, CSS

Frameworks: React, Node.js

Developer Tools: Git, VS Code, Visual Studio, Agile, SCRUM

Soft Skills: Communication, Teamwork, Attention to detail, Time management
